5353 S. Tamiami Trail • 941-925-4444

Creek's first settler suffered from shell-shuck Phillippi an oyster addict despite grouper therapy

About 1569 A.D., Fernando D. Phillippi sailed his ship, "Philly P" up the creek to a point which is now the corner of Bee Ridge Rd. and Beneva. All of the land between Bee Ridge and the Island is fill land on which to build condominiums - Fernando was a shrewd real estate investor.

Some of the piers you see in front of the restaurant are still original

pilings installed by Fernando's cousin, Pepe. The Phillippi Creek Oyster Bar is

*"It was a brave man that first ate an oyster."
-Jonathan Swift*

actually the converted winter home of the Phillippi family and has changed

little since being built in 1604.

Fernando D. Phillippi was last seen in 1619 during Hurricane Maria. The ship, with gunwhales awash, was visible off Island Park, and a voice was heard screaming, "more oysters!" Even now on moonlit nights a ghostly vision of the "Philly P" can be seen sailing up the creek without a paddle.

In the Old Florida Tradition Restaurant & Oyster Bar

Did You Know?

Studies among Greenland Eskimos, who consume large amounts of seafood and who are virtually free of heart disease, in spite of their high fat intake, have been interpreted to indicate a protective effect attributable to their large intake of marine animals. We do not yet know how much fish is needed nor how often one must consume seafood in order to benefit from it, nor even whether one's health would be similarly improved. However, the evidence strongly indicates that regular consumption of fish, especially the fatter varieties, gives substantial health advantages.

Sea Clam

Found in abundance in the ocean waters of the North Atlantic, the sea Clam grows up to 12 inches in diameter. Long known for its sweet tasting meat, it is now recognized for its nutritional benefits. It con-

tains omega 3 fatty acids which are important in maintaining a healthy heart.

Scallops

The scallop is a mollusk having two shells like clams and oysters. It propels itself along the ocean floor by opening and closing its hinged shell. The muscle controlling the shell movement is the muscle that we enjoy as scallop meat.

There are two prominent types of scallops: Sea scallops and bay scallops which are from the Chesapeake Bay south to the Gulf of Mexico. The two can be used interchangeably on the same recipe.

When selecting fresh scallops, examine the product for a creamy white or light pinkish color and a mild sweet odor. Raw frozen scallops can be held at zero degrees or below for 3 or 4 months.

Snapper

The snappers are one of the largest and most popular families of fish. There are some 34 species that inhabit the marine waters of the warmer regions of the United States. Well-known snappers with high food value are red, pink, mangrove or grey, yellow eye, mutton and yellow tail.

Snappers are taken in water often several hundred feet deep. Most of the catch is still made with hook and line. Many snappers are available year round in all parts of the country. The meat is juicy, white and very flavorful. This fish can be served broiled, baked, steamed or boiled, in a host of imaginative ways. Snapper is among the most delicious deep sea delicacies on the market.

Stone Crabs

There are over 4000 different species of crab in the world. One of these which is native to our Gulf Coast waters is the stone crab.

Only the claws of the stone crab are eaten, so when a crab is harvested, both claws are removed and the live crab must be returned to the water. The crab claws will regenerate in about six weeks. (The law used to read that only one claw could be removed from the crab so as not to leave it defenseless during this regeneration period.)

Years ago, when hunters were fixing their campfire meals of a stew and cornbread, they would throw balls of cornmeal to their dogs to quiet them. That is where the term "hush puppies" come from.

Hot Appetizers

Buffalo Shrimp	\$17.95
Fried Oyster Appetizer	\$13.95
Fried Calamari	\$14.95
Oysters Rockefeller	\$18.95
